Safety

General Safety Precautions

Before installing, operating or servicing this equipment, please read the following precautions carefully:

- This machine is equipped with moving belts. Do not place hands near the rear of this unit when the belts are moving as fingers may be pinched where belts enter the frame. We suggest the use of a roller-type exit conveyor or pack table for your cases. Always remove boxes after they clear the exit end of the machine.
- Observe caution when near the tape applying cartridges or when threading tape. The knife is very sharp, automatically operated and is linked to the wipe down rollers.
- Do not attempt to open or work on the electrical box, junction boxes or other electrical components of the unit without first disconnecting power to the machine. Electrical shock hazard exists if power is not disconnected.
- Do not by-pass any factory-designed safety features such as knife guards, interlocks, switches, etc.
- Do not place hands or body inside the confines of the machine unless the head mechanism is securely fastened, and the electrical supply is shut off.
- Never provide service or clear a box jam when machine is running.
- When feeding a box into the unit, always hold down the box top and present the box to unit. Release hands as soon as the belts begin to take the box.
- Do not wear loose clothing such as ties, scarves, jewelry etc. Long hair should be pulled back and/or covered while operating this machine.

Introduction

General System Description

Specifications

Model	SB-Ex Ran
Tape	1.5" (36mm) or 2" (50mm)
Belt speed	23m/min
Capacity	(L) 4.7in to unlimited (W) 3.9in to 24in (100mm to 610mm) (H) 4.7in to 24in (120mm to 610mm)
Consumption	450W
Machine size	(L) 46in (1160mm) (W) 40.6in (1030mm) (H) 61in (1550mm)
Machine net weight	

Options

- Stainless Steel
- 3" tape head
- Standard table
- Extend table

Dimensions

Installation

Carefully unpack the outer carton. Avoid damaging the machine body.

Remove the shipping bolts that secure the Case Taper to the shipping pallet. Lift the Case Taper off the pallet.

CAUTION! The SB-Ex Ran Case Taper is a very heavy piece of equipment and will require a forklift, floor crane, or several people to move safely off the shipping pallet. Use proper equipment when lifting the case taper and ensure the case taper is secure and will not shift while being moved or during height adjustment or installation of locking casters.

Install the 4 casters on the Case Taper legs. (Please refer to the diagram of casters and assembly hardware below).

CAUTION! The case taper must be lifted off the floor to install the casters. Use proper equipment when lifting the case taper. Ensure the SB-Ex Ran Case Taper is secure and will not shift while installing the casters or adjusting leg height.

The locking casters allow the SB-Ex Ran Case Taper to be moved easily over a smooth flat surface. If the unit must be lifted to move it to the desired location, you will need a pallet jack, floor crane, or fork lift to lift it.

Location Requirements

When installing the SB-Ex Ran Case Taper please be aware of the following considerations:

1. The mounting surface is flat and level.
2. Conveyor or packing table height.
3. Alignment with packaging line.

When the SB-Ex Ran Case Taper is positioned in the operating location you will need access to:

1. The power switch.
2. Height and width adjustments.
3. Tape loading (Both upper and lower tape cartridges).

A packing table may be provided at the in feed end where the packer can fill boxes and close the flaps prior to feeding the boxes into the machine. It is also convenient to have a pack table at the exit end of the taper.

It is essential that the table and conveyor be at the machine bed height.

The machine should be placed on a flat, level floor so that it does not rock or move. We recommend that the machine be securely locked in place when used.

Mount air pressure regulator to the 3 position switch and connect with air supply.

Operation

Loading the Tape Cartridges

Turn the main power switch to “Off” and disconnect the power.

CAUTION! To avoid personnel injury, remove the tape cartridge before loading tape.

When handling the tape cartridge be careful to avoid contact with the tape cutting blade.

After the taping cartridge has been removed push the tape roll onto the tape core assembly.

NOTE: Make sure the tape roll is pushed all the way on the spindle assembly.

Check Tension

Check the tape for correct tension. Tighten or loosen the tape core holder to adjust tension.

Thread Tape

Carefully thread the new tape through the rollers in the tape head as shown in the applicable diagram in the Tape Head User Guide provided with the tape head.

For convenience, diagrams for threading tape in the Eastey-EX Tape Head and EZ-EX Tape Head are provided on the following page. Follow the diagram that applies for your tape head, depending on the tape head model and position on the taper.

Easteey-EX Tape Head

Bottom Cartridge

Upper Cartridge

EZ-EX Tape Head

Bottom Cartridge

Upper Cartridge

Center Tape — Eastey-EX Tape Head only

Make sure the tape is centered on all the rollers.

There are several rollers in the tape cartridge where the tape alignment should be checked to verify the tape stays on center as it is being dispensed.

Return the tape cartridge to the operation position.

Main Spring

For sealing light weight boxes, decrease the main spring tension. For heavier boxes, increase the main spring tension.

When setting tension for the rollers, consider the amount of pressure on the box flaps required to make the seal. Cartons completely filled to the top with product may require more pressure on top and bottom seams when applying tape than partially-filled cartons, where excessive pressure could possibly crush the carton.

Power

Plug the power supply cord into a properly wired and grounded outlet.

See the following for operation of Main Power switch and Control Panel buttons and switch.

CAUTION! When the power is turned on be aware of moving parts and belts

Control Panel

POWER

When the main power switch is in the "ON" position the power lamp should be illuminated.

R1

This mode functions as memory for the height of the carriage position. If the operator has equal height or similar height of packages, this mode memorizes and stays at the position of last taping job. This function enables operators to speed up their packaging time, the top carriage moves up slightly after each taping. It reduces the taping time for the following cartons with equal height.

R2

This mode allows the top carriage to stay at top position. It is suitable for operations that have various sizes of taping cartons.

The top carriage will always stay at the top position when in this mode. It enables changes of wider range cardboard boxes.

START

Press the button to get automatic or manual program running.

STOP

Press this button to stop all operation. If operator needs to change modes the operator is required to press the STOP button and then press START button for operation.

RESET

All taper settings will return to the home position when RESET button is pressed.

EMERGENCY STOP

Press the button to get emergency stop.

MAIN POWER

Use to turn the main power on or off.

Adjustments

Air Pressure unit

Adjustments on the 3-function elements (see diagram).

Air capacity: 2500cm³/ min

Pressure setting: 6kg/cm²

Please inspect periodically to see if the drain system is functional and if lubrication oil is needed.

Height and Width Adjustment

If there is a gap between width and height chains it may result in poor taping. Use the chain adjusting screw and lock nut to correctly adjust the height and width.

Brake Adjustment

The most ideal distance between the carriage brake and brake plate is 0.2mm.

Maintenance

The SB-Ex Ran Industrial Case Taping System will provide many hours of maintenance free operation. There are a few items that may require attention from time to time.

Rollers

Make sure rollers stay clean and grease free. If you should have to clean the rollers simply wipe them down with a clean lint free cloth. If a more thorough cleaning is necessary wipe the rollers down with a mild detergent and water and let dry. **Never use harsh or abrasive cleaners or chemical agents when cleaning the rollers.**

Cutting Knives

Occasionally inspect the cutting knives to ensure they are clean and free of adhesive residue. Make sure the cutting knife is sharp by inspecting cuts in the tape. Cuts should be straight and neat. If the quality of cuts is eroding, the knife blade is dull and should be replaced.

Changing Knife Blades — Refer to Tape Head User Guide

Turn off and unplug the taper. It is not necessary to remove either tape head to change the blade. Refer to the Tape Head User Guide provided with the tape head for instructions for changing the knife blades.

CAUTION! Always be aware of the cutting edges while replacing the knife blades. Handle the knife blades carefully.

Troubleshooting

PROBLEM	POSSIBLE CAUSE	SOLUTION
If machine is not functioning.	a) The air force may be not sufficient b) The 2 knobs for height & width are not released. c) Defective infeed & exit photo eye sensor.	a) Adjust the air Pressure b) Unscrew the 2 knobs. c) Adjust or replace the photo eye sensor.
If the carriage air cylinder does not work.	a) Bended hoses & wirings. b) Chain is not in position properly.	a) Re-position hoses & wirings. b) Accommodate the chain and check if they are tightly screwed.
If positioning of the top carriage is not accurate.	Check if the gap between the brake and brake plate is well-adjusted.	The gap should be in 0.2mm.
If the side adjustor air cylinder does not run appropriately.	Bended hoses & wirings.	Re-position hoses & wirings.
If machine cannot accomplish the operation of taping on cartons.	Forces from the side belts are insufficiently transferred to the box.	Increase the forces by adjusting air.
If top carriage does not stay at middle position.	The wirings of sensor of the air cylinder may be loosen or defective.	Adjust or replace a new sensor.

Press the START button.	Diagnostic Indicator	Indicator Meaning
	START button flashes 1 time	Machine is set at R1 mode
	START button flashes 2 times	Machine is set at R2 mode.
	START button flashes 3 times	Machine is set at U mode.
	START button flashes 4 times	Machine is set at RESET.
	START button flashes 5 times	Motor overloaded. Check through all possible problems and press overloaded RESET button.
	START button flashes 6 times	STOP button is on. Or the wirings may be disconnected.

Press the START button.	Diagnostic Indicator	Indicator Meaning
	START button does not flash at all	a) Turn on the power, power indication light will be on. b) Release the E-STOP button.

Problem	Solution
Uneven Tape Leg on Front	<ul style="list-style-type: none"> • Tape tension is too low. Tighten the one-way clutch roller and/or the tape core. • Adjust the one-way clutch roller in the slot so it is slightly beyond the front wipe roller. • Adjust the tape leg length. See Tape Leg Adjustment section.
Uneven Tape Leg Rear	<ul style="list-style-type: none"> • Too much tape tension. Adjust the one-way clutch and or tape core. • Clean and ensure all rollers move freely. Lubricate all roller slots. • Tighten main spring.
Uneven or Torn Tape 	<ul style="list-style-type: none"> • Blade is dull. Replace blade. • Tape tension is incorrect. Increase tension. • Clean and adjust blade. • Blade mounted incorrectly or backwards. • Knife arm spring is worn. Replace knife arm spring. • Adjust cartridge height.
Tape Folding 	<ul style="list-style-type: none"> • Check that all rollers turn freely. • Check to be sure tape is threaded properly on front roller (page Error! Bookmark not defined.). • Check wipe down brush.

Problem	Solution
<p data-bbox="203 247 709 323">Tape Curling and Bunching Up — Easteley EX Tape Head Only</p> 	<ul data-bbox="748 254 1425 323" style="list-style-type: none"> • Adjust the tape cartridge height (approximately .06 inches from box)  <ul data-bbox="748 957 1425 1026" style="list-style-type: none"> • Check tape tension set by the spring tension at the tape core.

Warranty Statement

SB-Ex Ran Carton Sealing Machine

Warranty Statement

Eastey Enterprises warrants that all of the products it ships will be in good working order and free from defects in material and workmanship and will conform to the published specifications for that product.

Warranty Period

Drive motor(s):	1 year
Gear reducer:	1 year
Tapehead:	1 year (Except for moving parts which are subject to normal wear, tear and replacement which are warranted to be free from defects in material and workmanship.)
All other parts:	1 year (Except for moving parts which are subject to normal wear, tear and replacement which are warranted to be free from defects in material and workmanship.)

Taping Quality

Taping quality achieved in a given application is dependent on the installation, the material handling, and the maintenance provided. Eastey makes no warranty that the taping quality achieved in an application will be the same as that achieved on a test piece in our demo facility.

Shipping Policy

Customer pays all incoming shipping. If the item is defective and under warranty, Eastey pays return shipping charges for least costly method. If expedited shipping is desired, customer must furnish his shipping account and shipping fees will be charged to that account.

Warranty Verification

If you conclude that a product may be defective and may be covered by warranty, obtain a Return Material Authorization number by calling our technical support number (toll free at 1-800-835-9344, or 763-428-4846 or Fax: 763-795-8867 or e-mail: info@eastey.com) and return the defective item to Eastey. Eastey will analyze the product and, if found to be defective, we will, at our option, replace or repair the item. If the item is found to not be eligible for warranty, you will be notified and may decide on disposition. Defective products will be replaced or repaired as promptly as possible.

Warranty Eligibility

The warranty provided by Eastey Enterprises., Inc. is only to the original buyer.

Limited Warranty

THE ABOVE WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES, WHETHER EXPRESSED OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT.

Disclaimer of Damages

REGARDLESS OF WHETHER ANY REMEDY SET FORTH HEREIN FAILS OF ITS ESSENTIAL PURPOSE, IN NO EVENT WILL EASTEY ENTERPRISES., INC. BE LIABLE FOR ANY SPECIAL, CONSEQUENTIAL, INDIRECT OR SIMILAR DAMAGES, INCLUDING LOST PROFIT OR LOST OPPORTUNITIES OF ANY TYPE ARISING OUT OF THE USE OR INABILITY TO USE THESE PRODUCTS EVEN IF EASTEY ENTERPRISES., INC. HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.
